this volume offers the author s central articles on the medieval and early modern history of cartography for the first time in english translation a first group of essays gives an overview of medieval cartography and illustrates the methods of cartographers another analyzes world maps and travel accounts in relation to mapped spaces a third examines land surveying cartographical practices of exploration and the production of portolan atlases

this book consists of three volumes the first volume contains introductory accounts of topological dynamical systems finite state symbolic dynamics distance expanding maps and ergodic theory of metric dynamical systems acting on probability measure spaces including metric entropy theory of kolmogorov and sinai more advanced topics comprise infinite ergodic theory general thermodynamic formalism topological entropy and pressure thermodynamic formalism of distance expanding maps and countable alphabet subshifts of finite type graph directed markov systems conformal expanding repellers and lasota yorke maps are treated in the second volume which also contains a chapter on fractal geometry and its applications to conformal systems multifractal analysis and real analyticity of pressure are also covered the third volume is devoted to the study of dynamics ergodic theory thermodynamic formalism and fractal geometry of rational functions of the riemann sphere

in recent years geographic mental maps have made a comeback into the spotlight of scholarly inquiry in the area of international relations ir particularly foreign policy analysis fpa the book is framed within the mental map research agenda it seeks to contribute and expand the theoretical and empirical development and application of geographic mental maps as an analytical concept for international politics more precisely it presents a theoretical framework for understanding how mental maps are employed in foreign policy decision making and highlights the mechanisms involved in their transformation the theoretical framework presented in this book employs the latest conceptual and theoretical insight from numerous other scientific fields such as social psychology and organizational theory in order to test the theoretical propositions outlined in the initial chapters the book assesses how the carter administration s changing mental maps impacted its middle east policy in other words the book applies geographic mental maps as an analytical tool to explain the development of the carter doctrine the book is particularly targeted at academics students and professionals involved in the fields of human geography ir political geography and fpa the book will also be of interest to individuals interested in political science more generally while the book has is academic in nature its qualitative and holistic approach is accessible to all readers interested in geography and international politics luis da vinha phd is assistant professor of geography political science at valley city state university

the volume discusses the world as it was known in the medieval and early modern periods focusing on projects concerned with mapping as a conceptual and artistic practice with visual representations of space and with destinations of real and fictive travel maps were often taken as straightforward objective configurations however they expose deeply subjective frameworks with

social political and economic significance travel narratives whether illustrated or not can address similar frameworks whereas travelled space is often adventurous and speaking of hardship strange encounters and danger city portraits tell a tale of civilized life and civic pride the book seeks to address the multiple ways in which maps and travel literature conceive of the world communicate a weltbild depict space and or define knowledge the volume challenges academic boundaries in the study of cartography by exploring the links between mapmaking and artistic practices the contributions discuss individual mapmakers authors of travelogues mapmaking as an artistic practice the relationship between travel literature and mapmaking illustration in travel literature and imagination in depictions of newly explored worlds

this fourth edition of cartography visualization of geospatial data serves as an excellent introduction to general cartographic principles it is an examination of the best ways to optimize the visualization and use of spatiotemporal data fully revised it incorporates all the changes and new developments in the world of maps such as openstreetmap and gps global positioning system based crowdsourcing and the use of new web mapping technology and adds new case studies and examples now printed in colour throughout this edition provides students with the knowledge and skills needed to read and understand maps and mapping changes and offers professional cartographers an updated reference with the latest developments in cartography written by the leading scholars in cartography this work is a comprehensive resource perfect for senior undergraduate and graduate students taking courses in gis geographic information system and cartography new in this edition provides an excellent introduction to general cartographic visualization principles through full colour figures and images addresses significant changes in data sources technologies and methodologies including the movement towards more open data sources and systems for mapping includes new case studies and new examples for illustrating current trends in mapping provides a societal and institutional framework in which future mapmakers are likely to operate based on un global development sustainability goals
