jean martin charcot the iconic 19th century french scientist is still regarded today as the most famous and celebrated neurologist in the world despite the development of strong independent schools of thought in the usa uk and germany his salpêtrière school has become symbolic of the early development and rise of neurological practice and research this book presents a fresh look at the origins of nervous system medicine and at the fate of charcot s school and pupils special

emphasis is placed upon the parallels and interactions between developments in neurology and mental medicine clearly demonstrating that charcot is not only the father of clinical neurology but also wielded enormous influence upon the field we would come to know as psychiatry providing new insights into the life and work of charcot and his pupils this book will make fascinating reading for neurologists psychiatrists physicians and historians

pasteurization penicillin koch's postulates and gene coding these discoveries and inventions are vital yet commonplace in modern life but were radical when first introduced to the public and academia in this book the life and times of leading pioneers in microbiology are discussed in vivid detail focusing on the background of each discovery and the process in which they were developed sometimes by accident or sheer providence

wound healing and the myofibroblast a historical and biological perspective is the fruit of an interdisciplinary and international collaboration involving a historian of medicine dr zampieri a physician dr coen and a researcher prof gabbiani world renowned for his discovery of the myofibroblast this book aims to draw a concise yet complete description of the conceptual evolution of wound healing fibrosis and fibrosis related pathologies from antiquity to present time as well as commenting on the role of the myofibroblast and the key cell type essential for tissue repair and fibrosis from its identification in 1971 throughout its 50 years old history by viewing this complex and century long history from different perspectives the book's authors aim to draw an exhaustive overview with the hope of inspiring new and fruitful basic and clinical research interdisciplinary collaboration complementary views from medical historian a physician and a researcher a concise but detailed history of fibrosis readers can discover the major scientific breakthroughs along this history includes the pathophysiology of various fibrotic diseases explores the role of myofibroblast in fibrosis development

a unique book although pasteur's seminal contributions are known the background leading to these discoveries has been admirably recapitulated how studies to help sort the problems of wine and beer industry led to the recognition of micro organisms as the causative factor and to the denunciation of the then prevalent views on spontaneous generation the inability of an aged culture of fowl cholera to cause disease in chicken was not dismissed as a mistake but deduced to make two observations fundamental to development of vaccines namely a method to attenuate the virulence of the micro organisms and the use of such organisms as vaccines the vaccine for rabies was a landmark at a time when no electron microscope was available to visualize a virus also this was the first use of a vaccine for therapeutic purposes pasteur's heritage the institute that he created and scientists who worked with him and after him at this institute were responsible for discovery of the bacillus causing plague and also the way it spreads through fleas an observation made by them while working in india the

realization that the symptoms caused by diphtheria were at a point distant than the infective bacilli and hence due to a toxin elaborated the antisera for tetanus and diphtheria bcg the attenuated bovine tuberculosis bacillus for vaccination etc metchnikoff laid the basis of cellular immunity bordet discovered the complement system part i of the book provides historical insights on the development of immunology in the period between the two world wars the pasteurian and the grand germanic school of koch ehrlich and von behring the controversies which spurred progress and led to the enrichment of this discipline a chapter in part ii summarizes the current status of the vaccine which have historically been the most cost effective agents for control of diseases and have helped eradicate small pox from the surface of the globe part iii of the book has two thought provoking articles on the philosophical implications of the findings on immune mechanisms to other biological processes for example learning is not an acquired process from outside instructive theories on antibody formation are disproved instead it is selection and amplification that prevails the book concludes with an enlightening chapter on perspectives in modern immunology the immune system need not be conceived for the aggressive function of combating outside organisms the recognition of self is fundamental to its working
