the perpetual treadmill is a care pathway devised to ensnare the poor within a never ending treatment system for their own good after they have been labelled with their designated malaise once caught within it similar to kafkas trial and castle they are wedged within its corridors where they are forever signposted between services this book draws on the analogies of knights and knaves by building on bath of steel to focus on how this system has been constructed and then maintained to depict its shortcomings it has been ranged against a psychologically informed perspective psip to show how those entrapped can eventually exit the perpetual treadmill but there are numerous vested interests which militate against those clients duly labelled from ever emotionally recovering the interplay between politicians bureaucrats academics practitioners and clients is explored to detail how the poor have become a raw material which feeds this machine this book is relevant to psychotherapists addiction specialists psychologists sociologists criminologists clinical psychologists psychiatrists social workers social policy experts and nurses

although there is a strong and growing literature in the two areas of desistance and addiction recovery they have developed along parallel pathways with little systematic assessment of the empirical evidence about the co occurrence of the relationship or how one area can learn

from the other this book aims to fill that gap by bringing together emerging literature on the relationship between offending and substance use instead of focusing on the active period of its onset and persistence this book examines the mechanisms that support desistance addiction recovery and the common themes of reintegration and rehabilitation with contributions from a wide range of international experts in the fields of desistance and addiction recovery the book focuses on a strengths based relational and community focused approach to long term change in offending and drug using populations as well as the shared barriers to effective reintegration for both this book will be highly informative for a wide audience from academics and students interested in studying desistance and recovery to those working in addiction services and the criminal justice system as well as policy makers and the people undertaking their own journeys to desistance and recovery
